

There Corporation - Improving energy efficiency

There Corporation provides a platform for Home Energy Management solutions to enable sustainable future proof solutions and services. The company focuses on next generation smart metering to improve energy efficiency.

There Corporation provides a platform that combines Smart Metering, Smart Home, and Smart Grid solutions. This allows There and its partners to offer sustainable future proof solutions and services to their clients. There Corporation's main customers are leading utilities and service providers.

ThereGate - a flexible platform for energy saving technology

There Corporation focuses on energy saving and efficiency. The company's energy saving solutions are based on ThereGate - which was formerly known as the Nokia Home Control Center or HCC. ThereGate is a technology-independent open Linux-based platform that supports the most common smart home technologies. ThereGate is ideal for third parties to create new solutions and applications.

The value for the customer comes from the integration of

different individual devices and entire systems provided by 3rd party vendors into unified solutions, all under the control of one user interface. The first solutions intelligently control and monitor energy consumption and distributed production. There Corporation's solutions will be seamlessly integrated with other safety and security devices, such as temperature sensors and cameras.

Facts:

- Established: 2009
- Personnel: 25
- Operating areas: The headquarters of There Corporation are located in Helsinki, Finland. The company also has offices in Vaasa and Tampere, Finland.

COMPANY IN BRIEF

There Corporation, which specializes in smart metering and energy efficiency, was established in May 2009 by spinning off the Nokia Smart Home program and bringing along the know-how of mobile and platform technologies and business-to-consumer applications. The company then joined forces with a very experienced smart metering and energy grid solutions team from Comsel System.

Cleantech Finland® is a guarantee of cutting edge technologies and services as well as reliable and efficient business practices. Cleantech Finland unites the top Finnish cleantech companies and experts.
